Question 4. How might GenAI tools help you to achieve those goals while upholding your values?

Gen Ai can help me create a schedule to be on track. And assist me in my learning journey.

Question 5. How might GenAI tools undermine your values and goals?

They make me rely too much on them and forget my basic syntax.

Question 6. After weighing both sides, do you think GenAI tools are more helpful, harmful, or mixed for *your* learning in *this* course? In your education more broadly? Why?

My feelings are mixed because it can be very beneficial to my learning journey but also harmful at the same time if I rely too much on it.
